**HERE IS THE ELEGANCE YOU HAVE BEEN WAITING FOR
IT FITS YOUR LIFE THE WAY IT FITS YOUR HAND**

- Beautiful Swedish design that neatly fits the palm of your hand
- Keyboard optimized for one hand operation
- Smart top key for voice recording
- Easy volume adjustment during calls

DoCoMo by ERICSSON
ER 205 [Actual size]

SOPHISTICATED AND EASY TO USE

The ER205 is not just a beautifully designed phone. Simple access to a broad range of useful functions is the basis of the ER205 concept. Already loved in the rest of the world, our phones are designed for people who appreciate sophisticated design. The soft curves make the phone fit nicely in the palm of your hand. It will fit your life the way it fits your hand.

SMART TOP KEY FOR VOICE RECORDING

With the smart top key, you can record important phone conversations with the push of a button. In stand-by mode, the recording function can also be used for normal voice memos. You can record 20 memos for a total length of 60 seconds. It can not be more simple.

EASY VOLUME ADJUSTMENT DURING CALLS

During phone calls sound is crucial. The side keys of the ER205 can be used to adjust the volume during calls. In stand-by mode, you can adjust the ringing signal. By turning the volume all the way down, the vibration function will automatically be activated.

LARGE, CLEAR DISPLAY

The phone has a large clear LCD display. The display can show either Japanese or English. (It will display keyboard lock, vibration mode, ringing signal level, battery level and etc.)

DoCoMo Web site: <http://www.nttdocomo.co.jp/>

- Please call 0120-005250 for further information.
- Attention: The DoCoMo by ERICSSON ER205 can be used only in Digital GSM 900 or NTT Docomo 1800MHz system.
- Some product photographs in this catalog may differ slightly from the actual products.
- Product specifications and illustrations in this catalog may be subject to change without notice.
- Nothing for sale will be needed.
- Please refer to the product sheet in this catalog for the availability of each region and sales office.
- For a better product environment, please refer to its related web bulletin from "NTT DoCoMo Mobile phone".
- NTT DoCoMo (mobile phone) can also be used in some areas where radio waves do not reach, such as the shade of a building or underground in a building. In addition, if the antenna is not fully extended, the reception of the radio waves will be affected. The reception may be improved by the use of the external antenna or by holding the phone in the hand.
- The DoCoMo by ERICSSON ER205 is a mobile phone, and even if you do not use it while driving, there is a possibility that the driver's attention will be distracted.
- NTT DoCoMo mobile phone transmitter and receiver emit an electromagnetic signal. If the phone is used in an area where there are sensitive areas, it may not be desirable to use digital signals to be received accurately. In such cases, use an alternative for the voice connection.
